Since 1970...

At O'Neal we have been pioneers and innovators of MX and MTB clothing throughout our history and the history of our sports.

In the 1960's Jim O'Neal was there as it all started, an MX rider during the birth and initial growth of the sport. Jim was driven by a need to help his fellow riders (and himself) achieve more on bikes with equipment that was designed specifically for their needs. These same ideals inspired O'Neal to enter the mountain bike market in Europe and the USA in the late '80s.

Right from the start product development was a central part of O'Neal's philosophy. The types of bikes people were riding, and the tracks they chose to explore, heavily influenced what products O'Neal made. From the beginning O'Neal looked to leading manufacturing processes and material technology to assist and protect riders who were seeking to push the boundaries of what a man (or woman) on two wheels could do.

This philosophy is still very much central to O'Neal's product development today. Our innovative approach to product development has helped shape the industry.

47 years on and we are still pushing boundaries, and continuing to set new standard.

Two wheels, with or without an engine - the philosophy for O'Neal has been (and always will be) the same - the pursuit of excellence and innovation in riding gear.

ENJOY THE RIDE

## PROTECT THAT NOGGIN'

While none of us go riding thinking we are going to crash hard, we all know it happens. Having the right helmet is critical. The O'Neal 2017 helmets come in a variety of styles many of which exceed DOT, SNELL, ECE and ACU safety standards. All O'Neal helmets are designed using the latest technology allowing your head to stay cool with multiple vents and comfortable ultra plush liners. Each helmet is designed using the latest in CAD technology and tested at independent labs for safety security. Proper head safety is critical. Trust the company that's been producing protective apparel for over 45 years, trust O'Neal.

# TEN SERIES MIPS

**SIZES:** Adult XS - XXL

**AVAILABLE COLORS:** Neon yellow

## FEATURES

- Fiberglass lightweight shell construction
- Improved safety with MIPS® system of impact absorption technology
- Shell weight: 1.100g +/-50g
- Coolmax® padded liner - ultra-plush removable/washable
- Multiple oversized air vents and EPS channels for maximum ventilation and cooling
- Rubber roost nose guard
- Removable mouth piece for easy cleaning
- Height adjustable visor
- Double-D release chin strap
- Durable multi-colored clear coated graphics
- Meets DOT, ACU, AS/NZS and ECE 22.05 safety standards
- Replacement parts available at [www.oneal.eu](http://www.oneal.eu)

## TEN SERIES MIPS

Our lightest and most advanced MX helmet, aimed at racers, serious riders and those who want the ultimate protection.

We are proud to be partnering with MIPS® who are fast becoming synonymous with the ultimate in helmet protection technology.

## 10SERIES MIPS HELMET

Graphic: Color	Part No.	XS	S	M	L	XL	2XL
Mips: neon yellow	0640-1	01	02	03	04	05	06

Red = High Strain

The graphic was generated using a finite element computer model based on measurements obtained from nine accelerometers in a Hybrid III crash test dummy head.

The dummy head was subjected to an angled impact using the MIPS test rig.

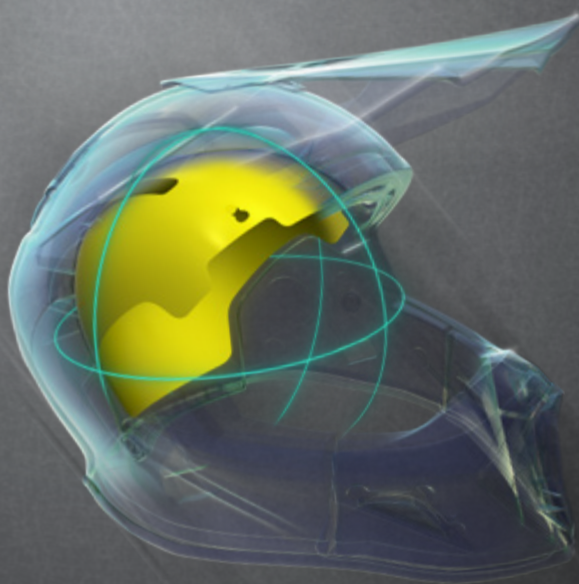

The model illustrates strain in the brain from a similar angled impact when the dummy head is wearing a helmet without MIPS and a helmet with MIPS.

mips: neon yellow

## MOTO XXX HELMETS

Back in '94 the most unlikely of characters joined together to change our sport and the industry forever! Moto XXX burst onto the scene with a vengeance releasing the Moto XXX videos and launching their own race team to compete in Supercross. Made up of misfits, degenerates and those that have been cast aside, Moto XXX entered the Supercross pits for round one in a funky-ass box van with a crazy paint scheme, carrying two riders, who were far too edgy for a corporate sponsor. With Music blaring, hot chicks flocking and free promo items flying, the pits became a party scene centered around the new Moto XXX team! One round later the team shocked the world as Brian Deegan won the night's 125 Supercross event launching his bike on a ghost-ride as he crossed over the finish line!

Moto XXX went on to be the most infamous privateer team in racing history! Racer X magazine named the team "An American Icon who in fact changed the face of Motocross and freestyle forever!" Moto XXX developed into a complete MX culture.

## SECOND SKIN

It's the layer of protection that wraps you like a 2nd skin, yet it needs to be comfortable enough, breathable enough, and cut just right so you hardly feel it at all. Making the finest in protective apparel is what we have done for decades. Ride in O'NEAL and you get the best of both worlds; perfect comfort, flexibility, and feel all while providing protection when you need it most.

## SECOND SKIN

It's the layer of protection that wraps you like a 2nd skin, yet it needs to be comfortable enough, breathable enough, and cut just right so you hardly feel it at all. Making the finest in protective apparel is what we have done for decades. Ride in O'NEAL and you get the best of both worlds; perfect comfort, flexibility, and feel all while providing protection when you need it most.

**IPX**  
INTELLIGENT PROTECTION

“THE NEXT LEVEL  
OF **MX** AND **MTB**  
IMPACT PROTECTION”

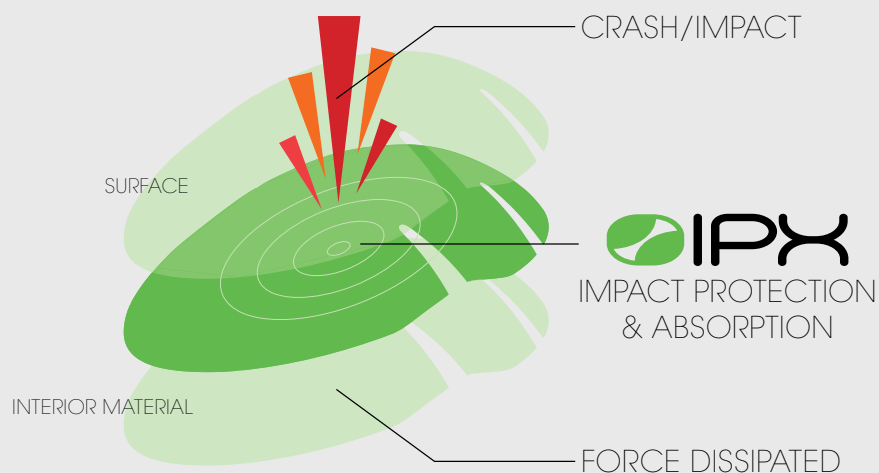

**Intelligent Protection** (IPX®) works with the rider, constantly adapting to both body and surrounding temperatures to provide the ultimate protection when you need it most. Whilst riding IPX® becomes soft and supple, moulding to the rider's body, providing 100% coverage of the area being protected and allowing the rider to manoeuvre with full freedom-of-movement.

# “FOCUS 100% ON THE RIDING”

In the event of a crash the IPX® impact foam instantly **hardens on impact**, providing protection against injury and minimizing the risk of permanent damage. IPX® then **returns to its soft and supple pre-crash state** and **can be crashed repeatedly** without compromising the structure and effectiveness of the foam.

Developed over a 2 year period, working with leading materials specialists and top DH and MX riders, this new impact foam technology offers unsurpassed levels of protection whilst maintaining freedom-of-movement, comfort and dexterity when riding.

Working with the leading laboratories in Europe, IPX® performs as well as the market leaders whilst delivering increased levels of flexibility and freedom of movement.

Exceeding CE EN1621 LEVEL 2 standards for motorcycle protection.

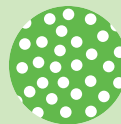

**BEFORE CRASH**  
Flexible & Comfortable

**DURING CRASH**  
Foam Hardens and Protects

**AFTER CRASH**  
Returns to flexible state

# MADASS MOVEO

### BOOTS

For boot development, we put our best foot forward! Dr. Doug Dubach has been an O'Neal test pilot for over 30 years and a Factory Yamaha test rider for over 25 years. As a 21 time Vet World Champion, nobody knows the importance of boot protection better than the Doctor. All O'Neal boots are thoroughly dirt tested and Doctor approved!
